

Every player, whether amateur or pro

knows what it feels like to be *in the zone*. When everything clicks and you can't miss. The sweet spot seems huge. Solid service returns, crisp volleys, running forehand winners. You are hitting better shots on every ball—taking your game to the next level.

What is EXO³?

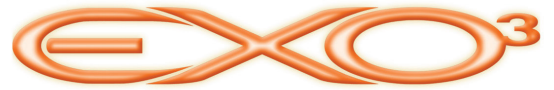

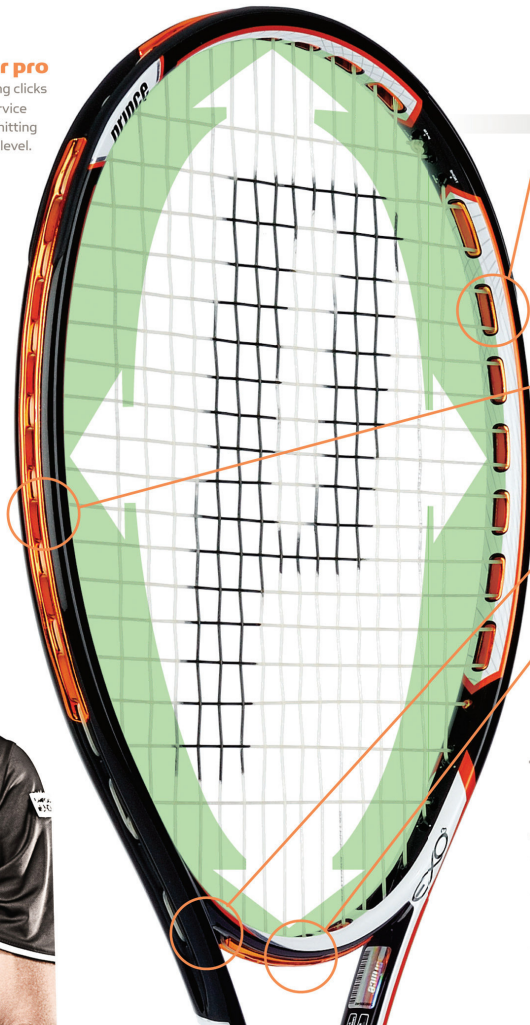

EXO³ racquet design utilizes large holes and string suspension to deliver racquets with the largest hitting area on the market.

How does it do this?

Strings are liberated from conventional, restrictive grommet holes, allowing the strings to respond more freely—even at the outer edges of the frame.

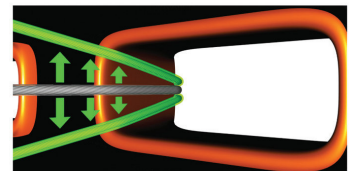

What does it provide?

A larger, more functional hitting zone in any head size giving all players the opportunity to hit better shots, more often. Now, even off-center hits feel and respond more like dead-center.

EXO³ TECHNOLOGY

EXO³
Large holes and string suspension let the strings respond more freely for enhanced response even at the outer edges of the frame.

New EXO³ Enhancements

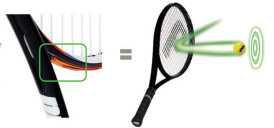

ENHANCED STRING SUSPENSION INSERTS*

Sleek new inserts combine the vibration dampening of thermoplastic with the 'pop' and responsiveness of carbon fiber for better hitting feel.

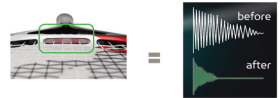

RE-ENGINEERED CROSS SECTION**

Added torsional stability means more power and accuracy.

BUILT-IN VIBRATION DAMPENING SYSTEM***

Double Bridge™ (DB) improves shock reduction and reduces string vibration for added comfort.

WHAT EXO³ MEANS TO THE PLAYER

TOUR SERIES |

- Better ball response and more 'pop'—even on shots hit off center or at full stretch.
- Large holes increase aerodynamics for faster racquet head speed delivering more power, spin and lightning-quick reaction.
- More consistent ball flight off the string bed provides increased accuracy on every shot, from anywhere on the court.

THUNDER SERIES |

- Largest sweet spot for enhanced power, comfort and control even on balls hit off-center.
- Opportunity to play big with a smaller head size for added maneuverability.
